SUMMARY

Program builder and systems leader with 10+ years of experience launching and scaling operationally complex, mission-driven initiatives. I design programs that connect platform infrastructure to real-world outcomes—balancing vision, execution, and long-term scale.

At SpiderOak, I built and led company-wide operations through post-Series C growth, launching internal systems, distributed teams, and cross-functional delivery frameworks. Outside of tech, I've spent years working hands-on with housing-related nonprofits in Kansas City—helping connect individuals with emergency shelter, long-term solutions, and the human support that makes housing possible.

I'm energized by big ideas that help real people—and I thrive when building the structure to make them scale.

CORE COMPETENCIES

- Program Design & Platform Integration
- Stakeholder Engagement (Partners, Nonprofits, Product Teams)
- Marketplace Operations & Ecosystem Thinking
- Global Team Leadership & Cross-Functional Execution
- Housing Access & Nonprofit Coordination
- Product Requirement Translation
- Operational Systems, SOPs, and Knowledge Sharing
- KPIs, Dashboards & Iteration Feedback Loops

PROFESSIONAL EXPERIENCE

SPIDEROAK

Vice President, Operations

Aug 2022 – Present

- Designed and scaled company-wide operational systems supporting a fully remote, global team.
- Launched cross-functional programs supporting engineering, customer success, HR, and product—from onboarding to performance systems.
- Built internal documentation systems and async onboarding flows that scaled team efficiency and institutional knowledge.
- Partnered across departments to translate strategic goals into scalable workflows and tooling systems.
- Led the rollout of programs that improved delivery quality, reduced handoff risk, and aligned metrics to user outcomes.

Vice President, Customer Success

Oct 2018 – Jul 2022

- Built the CS org from zero, aligning it with product and engineering to support retention and user success.
- Managed onboarding strategy and internal training resources across product lines.
- Served as internal product advisor, translating real user feedback into roadmap prioritization and launch success.

COMMUNITY & HOUSING EXPERIENCE

VOLUNTEER COMMUNITY LEADER

Housing Support & Nonprofit Coordination

2018 – Present

- Worked closely with nonprofits and regional support networks in Kansas City to help individuals facing housing insecurity.
- Led emergency housing placement efforts, coordinated with regional shelters and social services, and provided case-based follow-up.
- Created resource guides, referral pathways, and process improvements in partnership with local orgs to streamline housing support.
- Facilitated partnerships between community organizations to increase impact, especially during seasonal or crisis-based surges in need.

PROJECTS & VENTURES

FREELANCE CONSULTANT

Jul 2013 – Present

- Designed internal operations and program support systems for mission-aligned startups and community projects.
 - Built onboarding systems, nonprofit tech stacks, and resource planning templates for small organizations growing toward scale.
-

EDUCATION

B.S., History

Missouri Western State University

2000 – 2005

Trained in research, systems thinking, and communication—tools I now apply to program design and operational leadership.

TOOLS & TECHNOLOGIES

Program Design & Ops Tools

Asana • Notion • Airtable • Google Workspace • Slack • JIRA

Data & Performance Systems

Google Sheets • Excel • SQL • KPI Dashboards • Python (pandas)

Documentation & Enablement

Playbooks • Onboarding Guides • Internal Wikis • SOP Development

Community Platforms & Communication

Zoom • Substack • Ghost • Email Platforms • Intranet Tools
