SUMMARY

Multi-disciplinary operations leader with 10+ years of experience scaling high-performance teams, building systems from scratch, and driving cross-functional results. Proven success leading global, remote-first teams through complexity—from launching new workflows and tooling to improving operational KPIs through systems-level thinking and hands-on leadership.

At SpiderOak, I've led special projects across customer experience, product, legal, and infrastructure. I've built support orgs, rolled out automation pipelines, overseen performance dashboards, and managed sensitive team transitions—often all at once. I thrive at the intersection of systems, execution, and people.

CORE COMPETENCIES

- Workflow Design & Process Optimization
- Operational KPIs & Performance Strategy
- Global Team Development & Offshoring Support
- SOP Creation, Training Programs & Playbook Development
- Vendor / BPO Alignment & Communication Protocols
- Cross-Functional Ops: Legal, Product, CX, Engineering
- Internal Tooling (Airtable, GSheets, Notion, Slack)
- Data Fluency (SQL • Google Sheets • Python/pandas)

PROFESSIONAL EXPERIENCE

SPIDEROAK

Vice President, Operations

Aug 2022 – Present

- Led cross-functional programs across engineering, IT, customer success, legal operations, and HR.
- Designed and maintained KPIs for performance, quality, and efficiency across support workflows and internal operations.
- Scoped and launched distributed team infrastructure-building hiring systems, onboarding pipelines, and documentation for offshore contributors.
- Created and maintained playbooks, SOPs, and async onboarding resources to reduce ramp time and improve process consistency.
- Partnered with legal and compliance leads to align documentation and system access protocols across the org.
- Managed strategic ops projects related to internal tooling, team restructuring, and cross-departmental coordination.

Vice President, Customer Success

Oct 2018 – Jul 2022

- Built CS function from the ground up, increasing retention by 25% and reducing inbound backlog by 80%.
- Designed and implemented service workflows using Airtable, Zapier, and custom-built support tooling.
- Owned internal feedback loops between support, product, and engineering—streamlining triage and escalation logic.
- Led internal training and documentation strategy, including knowledge base redesign and AI-driven support chat tooling.

Customer Success Director

Jan 2017 – Sep 2018

- Developed support and success automation systems using ML triage and ticket routing.
- Scoped and ran pilot projects to test new ticket deflection and onboarding models before full implementation.
- Coached frontline managers and built team-wide performance review cycles aligned to growth metrics.

PROJECTS & VENTURES

FREELANCE CONSULTANT

Jul 2013 – Present

- Designed operations, documentation, and internal tooling workflows for startups in insurance, edtech, and clean energy.
- Built and optimized onboarding flows, playbooks, and async handoff systems for distributed and hybrid teams.

COMMUNITY & LEADERSHIP

RUSH CREEK VOLUNTEER LEADERSHIP TEAM

Ops Strategy & Knowledge Systems Lead

Aug 2023 – Present

- Developed team SOPs, training protocols, and feedback systems for a 375-member organization.
 - Implemented lightweight tooling to track volunteer onboarding, performance support, and resource allocation.
-

EDUCATION

B.S., History

Missouri Western State University

2000 – 2005

Trained in research synthesis, systems thinking, and communication—skills I now apply to real-time operational design.

TOOLS & TECHNOLOGIES

Ops & Workflow Design

Airtable • Notion • Google Sheets • Zapier • Slack • Asana • JIRA

Data & Automation

SQL • Python (pandas) • KPI Dashboards • Reporting Automation

Knowledge Systems

Playbooks • SOPs • Async Onboarding • Internal Documentation Systems
