Hiring Team
EvenUp

Dear EvenUp Team,

The scope of this role reads like a summary of the work I've been doing for years—building and scaling ops systems, managing cross-functional teams, and translating strategy into execution across legal-adjacent and product-driven environments. I'd love the chance to bring that experience to EvenUp.

At SpiderOak, I've led strategic initiatives across support, legal operations, product, and infrastructure—often at the same time. I've built onboarding and support workflows from scratch, created SOPs and playbooks to reduce variance and training time, and rolled out performance dashboards that help teams track the metrics that matter. I've also led distributed teams, managed vendor handoffs, and launched internal systems to support scalability and operational stability.

I'm equally comfortable deep in a spreadsheet as I am running a project kickoff or reviewing process design with a legal or product lead. I like finding gaps and building elegant solutions—especially in fast-moving, high-trust environments.

EvenUp's mission, pace, and cross-functional focus are a strong match for how I like to work. If it sounds like we might be aligned, I'd love to connect.

Warmly,
Adam Tervort
