SUMMARY

Strategic enterprise operator with 15+ years leading operational transformation across distributed, high-growth organizations. I build systems that scale—from process design and governance to cross-functional collaboration and performance measurement. I've driven company-wide change initiatives, designed operating models, and coached global teams through complexity and growth.

At SpiderOak, I architected and ran operations across engineering, HR, IT, assurance, and customer experience. I've led transitions to remote-first, implemented cross-org operating rhythms, managed technology systems, and embedded feedback loops that tie strategy to execution.

CORE COMPETENCIES

- Enterprise Operating Systems & Governance
 - Distributed Operations Design & Transition
 - Strategic Planning & Performance Frameworks
 - Business Process Optimization (BPM)
 - Cross-Functional Integration & Change Leadership
 - ICT & Systems Alignment with Business Goals
 - Remote Team Development & Leadership Coaching
 - Data-Driven Decision-Making (KPI Dashboards, Forecasting)
 - AI-Aware Tooling & Operational Intelligence
-

PROFESSIONAL EXPERIENCE

SPIDEROAK

Vice President, Operations

Aug 2022 – Present

- Built and led the company's enterprise operations function, spanning Engineering, DevOps, HR, IT, and Assurance.
- Led transition to a distributed operating model post-Series C; implemented scalable systems for onboarding, OKRs, internal mobility, and resource planning.
- Created and evolved internal operating frameworks connecting quarterly priorities, performance metrics, and team accountability.
- Partnered with finance and CEO to secure \$13M funding; translated investor goals into cross-functional operational plans.
- Directed systems-level initiatives across compliance, assurance, remote culture, and performance enablement.
- Aligned internal ICT and knowledge management systems to support global asynchronous collaboration and reduce single points of failure.
- Spearheaded rollout of AI-driven internal tooling to streamline knowledge sharing, training, and async performance feedback.

Vice President, Customer Success

Oct 2018 – Jul 2022

- Launched and scaled the CS org—improving retention by 25% and increasing ARR by 15%.
- Implemented lifecycle models, training systems, and feedback structures that integrated with product, engineering, and sales.
- Served as internal GM for secure collaboration product, bridging customer, product, and strategic roadmap perspectives.
- Designed integrated performance measurement tools and coordinated strategic customer onboarding across commercial and government clients.

Customer Success Director

Jan 2017 – Sep 2018

- Implemented unified GTM and CX workflows; developed scalable documentation and onboarding systems to reduce manual load.
- Deployed AI and ML tooling to improve customer triage, deflection, and resolution—cutting backlog by 80% and resolution time by 60%.
- Co-developed performance review frameworks for frontline managers and customer experience teams.

PROJECTS & VENTURES

FREELANCE CONSULTANT

Jul 2013 – Present

- Designed operational and documentation systems for scaling startups across fintech, solar, and edtech sectors.

- Built internal handbooks, async onboarding frameworks, and leadership coaching templates for remote-first teams.
-

COMMUNITY & ADVISORY LEADERSHIP

RUSH CREEK VOLUNTEER LEADERSHIP TEAM

Strategic Ops & Change Lead

Aug 2023 – Present

- Led transition from informal community operations to a documented leadership and welfare framework for 375 members.
 - Built crisis response protocols, people development systems, and operational governance for distributed teams.
-

EDUCATION

B.S., History

Missouri Western State University

2000 – 2005

Grounded in research, systems thinking, and historical pattern recognition—tools I now apply to modern organizational design.

TOOLS & TECHNOLOGIES

Ops & Governance

Notion • Airtable • Asana • Google Workspace • GitHub • Miro • JIRA

ICT & Data Systems

SQL • Python (pandas) • REST APIs • Jupyter • KPI Dashboards

AI & Automation

OpenAI APIs • Claude • Zapier • Internal LLM tooling & async workflows

Knowledge & Documentation

Internal Wikis • Async Playbooks • Process Frameworks • Org Design Diagrams
