SUMMARY

Strategic generalist and founding-ops type with 10+ years of experience building high-leverage systems across GTM, compliance, finance, people, and product. I've run everything from board reporting to onboarding automation—always in startup environments where clarity, adaptability, and action matter most.

At SpiderOak, I led company-wide operations through post-Series C scale—designing our operating cadence, launching internal tooling, managing compliance across functions, and owning the systems side of sales, marketing, and CX. I've worked side-by-side with technical founders, built trust with investors, and helped scale chaos into durable clarity.

AREAS OF OWNERSHIP

- GTM Infrastructure (Salesforce, GA, AdWords, Lifecycle Ops)
- Onboarding & Customer Success Systems
- Internal Tooling & Automation (Airtable, Notion, Zapier)
- Finance Reporting & Scenario Modeling (GSheets, SQL, Board Pack Design)
- Regulatory Ops & Policy Enablement
- HR, Performance Management, and Culture Ops
- Legal & Vendor Management / Contracting
- Async Operating Cadence & Internal Comms Design

PROFESSIONAL EXPERIENCE

SPIDEROAK

Vice President, Operations

2022 – Present

- Built and led internal operations during post-Series C growth: owned strategic planning, OKRs, and internal tooling across engineering, GTM, and HR.
- Partnered directly with finance and CEO on investor comms, board reporting, and budget planning.
- Led compliance and vendor onboarding workflows across departments (legal, security, CX, and product).
- Designed async company operating system: meeting cadences, dashboard rhythm, documentation standards.
- Managed HR operations, including hiring systems, onboarding, performance feedback, and internal mobility frameworks.

VP, GTM & Customer Ops (CrossClave Product)

2018 – 2022

- Owned go-to-market execution across sales, marketing, and customer success.
- Migrated the company from Mailchimp to Salesforce Marketing Cloud; implemented unified CRM + marketing stack.
- Rolled out Google Analytics + AdWords tracking infrastructure; built attribution models and reporting systems.
- Designed support automation and customer onboarding flows to improve retention and reduce ramp time.

Customer Success Director

2017 – 2018

- Built CS organization from scratch; increased retention by 25% and reduced inbound backlog by 80%.
- Managed vendor relationships for tooling, documentation, and support automation.
- Translated customer insights into product requirements and internal knowledge loops.

COMMUNITY & SPECIAL PROJECTS

VOLUNTEER SYSTEMS LEADER (KANSAS CITY)

Housing Navigation & Community Resource Coordination

2018 – Present

- Built operational workflows for emergency housing support, resource allocation, and nonprofit partnerships
 - Led case-based problem solving for vulnerable community members facing complex housing crises
 - Managed multi-stakeholder coordination, documentation protocols, and community feedback loops
-

TOOLS & STACK FLUENCY

Ops & Finance

Google Sheets • Airtable • SQL • Stripe • Payroll Systems • Budget Planning

GTM & Customer Tools

Salesforce • GA • AdWords • Intercom • Zendesk • Email Automation • Knowledge Bases

Automation & Infra

Zapier • Notion • Slack • JIRA • GDrive • Internal Wikis • Handbooks

AI + Data Tooling

OpenAI API • Claude • Cursor • LLM-based support automation • Internal agent workflows

EDUCATION

B.S., History

Missouri Western State University

2000 – 2005

Trained in systems thinking, research, and narrative structure—tools I now apply to operating frameworks and team design.
