PROFILE

Strategic operator and systems builder with a decade of experience scaling high-trust, high-output teams across engineering, customer experience, marketing, and operations. I've built internal operating models, led product-aligned go-to-market teams, and translated complex technical vision into simple frameworks that guide real execution.

As VP at SpiderOak, I helped lead the company through post-Series C growth—building unified marketing/sales systems, designing async collaboration structures, and leading special projects across product, security, and compliance. I've also led technical onboarding, agent-based tooling adoption, and internal enablement at scale.

Curious, systems-minded, and low-ego—I like big ideas and messy problems.

AREAS OF IMPACT

- Startup Systems & Operating Cadence
- Cross-Functional Program Design
- AI Agent Tools & Infrastructure Use
- Product Feedback Loops & Enablement
- Strategic Narrative & Internal Communication
- Martech + RevOps Stack Design (Salesforce, GA, AdWords, MC)
- Customer Experience Systems (Support, Onboarding, Self-Service)
- Early Team Leadership & People Systems
- Writing, Positioning, and Narrative Development
- Internal Automation & AI-Augmented Workflow Design

RECENT ROLES

SPIDEROAK

Vice President, Operations & Strategic Programs

2022 – Present

- Built and scaled internal operating systems during a post-Series C growth phase
- Led cross-functional programs across engineering, DevOps, CX, legal ops, and compliance
- Rolled out async onboarding, knowledge sharing, and internal documentation architecture
- Piloted and deployed LLM-based tooling for team support and internal agent workflows
- Translated board/investor priorities into operating plans and feedback cycles across teams

Vice President, Customer Success & Marketing Ops

2018 – 2022

- Owned GTM infrastructure and narrative for the CrossClave product
- Led integration of Google Analytics, Salesforce, AdWords, and Salesforce Marketing Cloud
- Created internal onboarding and CS tooling to improve retention and speed up ramp
- Served as product/market translator between engineering, design, and CX
- Partnered on strategic roadmap development based on real user data and pain points

Customer Success Director

2017 – 2018

- Built and scaled support and success playbooks from zero
- Implemented AI/ML-based support automation workflows to reduce backlog by 80%
- Created internal comms and lifecycle management systems across sales, CS, and support

SIDE PROJECTS & EXPERIMENTS

HOUSING & COMMUNITY SYSTEMS (KC METRO AREA)

- Partnered with nonprofits and regional coalitions to build resource maps and placement systems for unhoused residents
- Designed communication protocols and volunteer onboarding workflows during high-intensity seasonal response periods

FREELANCE SYSTEMS & GTM CONSULTING

- Helped startups in fintech, solar, and nonprofit tech develop onboarding, retention, and sales enablement architecture

- Built messaging frameworks, sales flows, and internal handbooks for scaling teams
-

TOOLS & LANGUAGES

Ops/Infra: Salesforce • GA • AdWords • Airtable • Zapier • Notion • GDocs • JIRA

Data/Modeling: SQL • Python (pandas) • Jupyter • KPI Dashboards

LLM/AI: Cursor • OpenAI API • Claude • Agents SDK (in experimentation)

Communication: Substack • Internal Wikis • Executive Memos • Async Briefs
