SUMMARY

Strategic operator and systems thinker with 10+ years of experience leading cross-functional programs in high-growth SaaS and fintech-adjacent environments. I've built customer experience teams from the ground up, managed complex launches with product and engineering partners, and aligned internal systems with external partner expectations.

Known for translating ambiguity into traction. Equally comfortable managing a Gantt chart, modeling metrics in SQL or pandas, or holding a high-stakes call with a strategic partner. Curious, organized, and human-centered—I care about the details because they add up to real outcomes.

CORE COMPETENCIES

- Program & Project Leadership
- Customer Experience Design
- Partner Management & Executive Communication
- Cross-Functional Product Collaboration
- KPI Design & Outcome Measurement
- GTM Execution & Strategic Planning
- Operations Systems & Process Mapping
- Data Fluency (SQL • Sheets • Python/pandas)

PROFESSIONAL EXPERIENCE

SPIDEROAK

Vice President, Operations

Aug 2022 – Present

- Led cross-functional initiatives across Engineering, Product, DevOps, and Customer Success, owning full lifecycle from scoping to delivery.
- Supported customer experience transformation—introduced new onboarding models, built feedback loops, and redesigned escalation workflows.
- Partnered directly with enterprise and government clients to align expectations, drive rollout success, and resolve performance challenges.
- Managed quarterly OKRs, Gantt-based planning, and cross-team accountability cadences for high-priority initiatives.
- Developed performance dashboards and internal analytics workflows using SQL and pandas to track service outcomes and optimize resource use.

Vice President, Customer Success

Oct 2018 – Jul 2022

- Built and scaled the CS org from scratch, improving retention by 25% and increasing ARR by 15%.
- Designed lifecycle programs and CX playbooks for onboarding, product adoption, and long-term engagement.
- Served as internal GM for CrossClave product line, collaborating closely with Product and Engineering to deliver high-impact features aligned to customer need.
- Led A/B testing of support and servicing models to improve ticket deflection, reduce inbound volume, and increase satisfaction.

Customer Success Director

Jan 2017 – Sep 2018

- Integrated support, marketing, and sales systems into a unified GTM motion, reducing churn and improving cross-team transparency.
- Launched an ML-driven help center and AI-powered triage tools—cut wait time by 50%+ and dramatically increased first-contact resolution.
- Facilitated partner review cycles and CX audits to drive process improvements and deepen engagement.

PROJECTS & VENTURES

FREELANCE CONSULTANT

Jul 2013 – Present

- Partnered with founders and small teams to design and launch strategic operations systems—from CX tooling to internal enablement workflows.
 - Delivered multi-stakeholder projects in insurance, edtech, and renewable energy with measurable gains in adoption and retention.
-

COMMUNITY & ADVISORY LEADERSHIP

RUSH CREEK VOLUNTEER LEADERSHIP TEAM

Strategy & Ops Lead

Aug 2023 – Present

- Oversaw strategic planning and people systems for a 375-member community org.
 - Managed partner relationships, volunteer onboarding, and internal communication strategy.
-

EDUCATION

B.S., History

Missouri Western State University

2000 – 2005

Built foundational research, systems design, and communication skills—still at the heart of how I work today.
