SUMMARY

Strategic technical program leader with 10+ years of experience managing secure SaaS operations, customer-facing risk programs, and cross-functional engineering initiatives. Former VP at SpiderOak, where I helped scale security-first backup and collaboration tools used by government and enterprise clients. For more than a decade, I served as the key point of contact for inbound security and bug reports—owning triage, internal escalation, and remediation coordination.

Hands-on with Python and automation tools. Comfortable diving deep into technical root causes and communicating clearly with both engineers and executives. Experienced in building trust with external partners and creating durable workflows to track and resolve issues. A strong fit for high-visibility programs that require clarity, discipline, and empathy.

CORE COMPETENCIES

- Security Incident Intake & Remediation Coordination
- Vulnerability Report Management (POC)
- Stakeholder Alignment & Program Ownership
- Automation & Data Analysis Using Python
- Cross-Org Communication & KPI Reporting
- External Collaboration & Researcher Relations
- SaaS Infrastructure & Secure Collaboration Platforms
- Fluent in Mandarin Chinese

PROFESSIONAL EXPERIENCE

SPIDEROAK

Vice President, Operations

Aug 2022 – Present

- Directed company-wide programs across Engineering, DevOps, IT, and Assurance for secure collaboration and backup tools.
- Served as primary contact for inbound bug and security reports across SpiderOak's legacy and current products.
- Triageed reports, coordinated internal investigations, and tracked remediation from initial intake to public communication.
- Developed Python-based tools to assist in report analysis and trend tracking across historical incident data.

Vice President, Customer Success

Oct 2018 – Jul 2022

- Led the customer success team supporting security-sensitive clients and managed escalations related to security findings.
- Acted as cross-functional liaison between engineering and clients to scope technical issues and plan fixes.
- Participated in root cause analysis, post-incident reviews, and contractual SLA responses.
- Supported high-visibility report responses shared with leadership and external partners.

Customer Success Director

Jan 2017 – Sep 2018

- Owned bug intake workflows and designed internal escalation protocols for technical and security incidents.
- Created playbooks for incident validation, stakeholder communication, and end-to-end tracking.
- Maintained knowledge base articles and documentation for customer-facing security responses.

Support Engineer

Jan 2014 – Jan 2017

- Received, verified, and documented user-submitted bugs and security issues on macOS, Linux, and web platforms.
- Partnered with engineering to coordinate time-sensitive fixes and validated patch effectiveness before release.
- Helped build the internal tooling that scaled our secure support environment.

PROJECTS & VENTURES

FREELANCE CONSULTANT

Jul 2013 – Present

- Delivered secure workflow automation and data integrations for small businesses and nonprofits.
 - Built reporting dashboards and analytics tools using Python and no-code platforms.
-

COMMUNITY & ADVISORY LEADERSHIP

RUSH CREEK VOLUNTEER LEADERSHIP TEAM

Volunteer Community Leader

Aug 2023 – Present

- Lead operations and internal coordination for a 375-member volunteer group, with focus on systems for trust and resilience.

KANSAS CITY JAZZ ACADEMY

Jazz Bass Instructor

Sep 2018 – Present

- Teach collaborative performance skills through ensemble-based instruction.

MANY MOODS CHOIR & ORCHESTRA

President, Board of Directors

Jul 2014 – Jun 2020

- Managed governance, fundraising, and production logistics for a regional arts nonprofit.
-

EDUCATION

B.S., History

Missouri Western State University

2000 – 2005

Built strong foundations in systems thinking, research, and written communication.

TOOLS & TECHNOLOGIES

Security & Incident Response

Bug intake systems • Vulnerability lifecycle tracking • Escalation and remediation workflows

Programming & Automation

Python • pandas • REST APIs • Scripting for triage and reporting

Collaboration & Process

GitHub • JIRA • Google Workspace • Microsoft 365 • Slack • Zoom

Customer-Facing Systems

Secure SaaS platforms • CRM integrations • Knowledge base design
