SUMMARY

Strategic operator and people-first executive with 10+ years of leadership at SpiderOak, where I've scaled systems and teams across engineering, HR, IT, and customer success. I bring deep experience aligning enterprise technology with people strategy—leading high-impact digital transformations, implementing AI-enhanced workflows, and integrating global operations for scale.

I thrive at the intersection of technical execution and human enablement. From HRIS strategy and real estate operations to budget ownership and leadership coaching, I've built the connective tissue that enables distributed teams to move fast and deliver with excellence.

CORE COMPETENCIES

- People Systems Strategy (Workday, AI workflows, remote-first tooling)
 - HR Operations, Budget Planning & Forecasting
 - Cross-Functional Alignment & Program Execution
 - Digital Employee Experience & Change Management
 - Enterprise Tooling & Infrastructure (Okta, O365, custom integrations)
 - People Leadership, Coaching, & Culture Building
 - AI Integration & Process Automation
 - Workplace Ops & Remote Collaboration Strategy
 - Strategic Communications & Executive Reporting
-

EXPERIENCE

SPIDEROAK

Vice President, Operations

2022 – Present

- Led global operations across HR, Engineering, IT, DevOps, and Customer Success for a remote-first, high-trust SaaS company.
- Directed full transition to O365 and implemented org-wide Okta SSO, integrating enterprise tooling to enable a secure, AI-assisted remote workforce.
- Partnered with Finance to build and manage department-level budgets, supporting quarterly forecast cycles and workforce planning.
- Architected AI-enabled workflows across support and operations, increasing efficiency and reducing time-to-resolution by 40%.
- Spearheaded internal communication rhythm, including People Ops program planning, employee lifecycle tooling, and internal feedback loops.
- Played a pivotal role in company-wide reorg and post-funding M&A integration planning.

Vice President, Customer Success

2018 – 2022

- Built and led CS org from scratch; improved retention by 25% and launched AI-powered support initiatives.
- Designed and executed onboarding, engagement, and escalation frameworks across distributed customer teams.
- Integrated new billing and back-office systems, enabling financial reporting and product usage data flow into HR and GTM planning.
- Drove alignment between CS, product, and engineering using shared OKRs and collaborative roadmap planning.

Director, Customer Success & Support

2017 – 2018

- Developed and launched internal playbooks for training, feedback, and customer interaction—standardizing experience across time zones and support tiers.
- Partnered with engineering to streamline user feedback into design and support prioritization.
- Managed transition from legacy support stack to integrated CRM and help center with AI-driven suggestion engine.

PROJECTS & VENTURES

PEOPLE SYSTEMS & REMOTE OPS MODERNIZATION

- Directed migration to O365 and deployment of Okta across the org.
- Led tooling and knowledge-sharing initiatives to support remote employee experience at every lifecycle stage.
- Integrated custom onboarding workflows, Slack-based async updates, and security-

focused operational policies.

CROSS-FUNCTIONAL LEADERSHIP COACHING

- Designed internal leadership development for managers in product, support, and engineering.
 - Mentored new people leaders and coordinated culture initiatives to strengthen feedback and communication norms across teams.
-

COMMUNITY LEADERSHIP

RUSH CREEK LEADERSHIP COUNCIL

Volunteer Community Leader

2023 - Present

- Direct strategy and execution for a 375-member volunteer-led organization.
 - Coordinate mentorship and support programs, manage budget and outreach operations.
-

EDUCATION

B.S., History

Missouri Western State University

2000 - 2005

TOOLS & TECHNOLOGIES

People Systems & Ops

Workday • Okta • Microsoft 365 • Google Workspace • Zoom • Slack • Jira • AI Agents & Automation Tools

Programming & Data

Python (pandas) • SQL • HTML/CSS • REST APIs

AI & Automation

OpenAI (ChatGPT, Whisper APIs) • Claude • AI-driven workflow design

Web & Knowledge Management

WordPress • Notion • Static Site Generators • Internal Documentation & Onboarding Systems
