SUMMARY

Strategic operations leader with 10+ years of experience building internal infrastructure and leading high-impact cross-functional initiatives in remote-first SaaS environments. Skilled in aligning systems, tools, and execution across product, IT, and business operations. Fluent in enterprise tooling rollouts, internal comms, and executive planning rhythms (QBRs, OKRs, budgeting).

Equally comfortable designing org-wide workflows, managing DevOps-led tooling implementations (e.g. 0365, Okta), or presenting program updates to VP+ stakeholders. Values clarity, speed, and scaling humans with systems.

CORE COMPETENCIES

- Enterprise Systems Rollouts (Okta, 0365, SaaS Stack)
- Strategic Planning (OKRs, QBRs, Budgeting)
- Cross-Functional Ops & Executive Alignment
- Internal Enablement Tooling & Documentation
- Program & Portfolio Management (PMO-aligned)
- Contractor & Vendor Management
- AI-Augmented Workflows & Team Tooling
- Remote-First Org Design & Productivity

EXPERIENCE

SPIDEROAK

Vice President, Operations

2022 – Present

- Directed company-wide strategy and operations across Engineering, DevOps, IT, HR, and Customer Success.
- Led end-to-end implementation of enterprise systems (Okta, Microsoft 365) in coordination with DevOps and security.
- Built scalable internal documentation and communication systems for remote execution and visibility.
- Ran QBR and annual planning cadences for department heads, integrating tooling performance and org-wide KPIs.
- Oversaw contractor sourcing, onboarding, and long-term vendor relationships for compliance and assurance.

Vice President, Customer Success

2018 – 2022

- Built CS org and back-end support systems, improving retention and reducing operational churn by 25%.
- Co-led system integration during product expansion and new vertical onboarding (B2G, enterprise, and compliance-heavy clients).
- Created onboarding and performance reporting pipelines for enterprise accounts.

INTERNAL SYSTEMS PROJECTS

- **Enterprise Tooling Revamp:** Oversaw phased transition to Microsoft 365, Okta, and Notion as source-of-truth platforms. Built SOPs and onboarding materials to scale rollout.
- **OKR & QBR Infrastructure:** Introduced quarterly planning cadences, aligning team objectives with org-wide metrics and tool-supported dashboards (Airtable + Sheets + Slack automations).
- **Signal Lights Dashboards:** Created department-level visibility systems for people metrics, velocity tracking, and risk alerts.
- **AI Tools Deployment:** Enabled AI-native workflows (Cursor, Claude, GPT) across product and operations teams to increase throughput and internal clarity.

TOOLS & TECHNOLOGIES

Systems: Microsoft 365 • Okta • Airtable • Notion • Slack • Linear • Zoom

Data/Automation: SQL • Python (pandas) • Google Sheets • Zapier • Jupyter

AI Tooling: OpenAI APIs • Claude • Whisper • AgentKit-style ops

Project Management: GitHub • JIRA • Asana • Notion

Compliance/Support: HelpScout • CRM/Support tooling • Internal audit readiness

EDUCATION

B.S., History

Missouri Western State University - 2005
