Hiring Committee
FCCS

Dear FCCS Team,

Bringing together bold ideas, grounded systems, and human-centered collaboration to shape the digital future of the Farm Credit System? That's exactly the kind of work I love doing.

At SpiderOak, I've spent the last decade leading cross-functional teams across engineering, DevOps, and operations—merging secure infrastructure with thoughtful collaboration strategy. Alongside that work, I've built and hosted internal events, run company-wide all-hands meetings, and created cross-functional planning cadences that brought teams into alignment and gave leadership the clarity they needed to move forward. Whether integrating product and platform teams post-acquisition or leading our enterprise tooling migration to 0365 and Okta, my focus has always been the same: enable better decisions through structured conversations and shared insights.

But facilitation isn't just a function—it's something I live. I've built multi-stakeholder events from the ground up, including GenealogyKC and the KC Temple Run, and I currently serve as a jazz instructor and tech lead at the Kansas City Jazz Academy's summer camps. I know what it takes to hold a room, ask good questions, and bring the right people into the right conversations at the right time.

I'm excited by the chance to help FCCS advance digital strategy not through top-down control, but by convening people who care, facilitating shared learning, and aligning action around collective progress. That's the kind of systems thinking I thrive on—and I'd be honored to bring that energy to your work.

Thanks for considering my application. I'd love to talk more.

Warmly,
Adam Tervort
