SUMMARY

Strategic operator with 10+ years leading cross-functional business operations in fast-paced SaaS environments. Proven track record of designing and scaling internal systems, aligning product and customer-facing teams, and launching impactful initiatives across operations, analytics, and CX.

Builder of high-trust stakeholder relationships and repeatable processes. Fluent in SQL, AI tooling, and marketplace dynamics. Obsessed with making complex systems clear, efficient, and human-centered.

CORE STRENGTHS

- Strategic Program & Initiative Delivery
- Cross-Functional Stakeholder Management
- SQL + Airtable + Dashboard Reporting
- OKR Planning & Strategic Prioritization
- Customer Retention & Lifecycle Ops
- Scalable Workflow & SOP Development
- Team Enablement & Internal Comms
- Marketplace Supply/Demand System Design

EXPERIENCE

SPIDEROAK

Vice President, Operations

Aug 2022 – Present

- Own strategy and execution for internal operations across engineering, CX, IT, HR, and compliance.
- Lead company-wide systems design: performance reporting, async cadences, onboarding, and knowledge hubs.
- Drove strategic alignment through weekly ops reviews and quarterly OKR planning.
- Collaborated with product team to streamline delivery cycles and increase execution velocity by 30%.
- Built SQL-based internal dashboards to track NPS, churn, and onboarding funnel conversion.

Vice President, Customer Success

Oct 2018 – Jul 2022

- Built and scaled customer success org; increased retention by 25% and NRR by 18%.
- Partnered with legal and product leads on compliance readiness, security reviews, and B2G onboarding.
- Led new business launch strategy for government sales, including onboarding playbooks and risk mitigation SOPs.
- Delivered weekly performance reviews tied to strategic metrics; surfaced user experience insights into product roadmap.
- Introduced AI tools to support help center generation, onboarding scripting, and user feedback tagging.

SELECTED PROJECTS

- **Onboarding Workflow Overhaul** – Reduced onboarding time-to-first-value by 40% through tooling, support, and internal alignment.
- **CrossClave GTM Enablement** – Owned customer-facing strategy for encrypted collaboration product, aligning CS, product, and sales for launch readiness.
- **AI Operations Toolkit** – Piloted internal LLM use for support scripting, data normalization, and async comms; trained team on automation workflows.
- **Freelance Ops Consulting** – Supported early-stage founders in legaltech and healthtech with marketplace infrastructure, analytics dashboards, and retention modeling.

TOOLS & TECHNOLOGIES

SQL • Python (pandas) • Airtable • Google Sheets • Jupyter • Looker • Notion • HelpScout • Fivetran
OpenAI APIs • Claude • ChatGPT • AI-based documentation generation • Slack • Linear • GitHub

EDUCATION

B.S., History
Missouri Western State University
2000 - 2005
