SUMMARY

Strategic and people-centric operations executive with 10+ years of experience scaling people systems, infrastructure, and shared services in high-growth tech environments. As VP of Operations at SpiderOak, I led cross-functional operations spanning HR, IT, CX, and engineering. I specialize in building scalable processes, enabling distributed teams, and leading people programs that align business outcomes with human-centered design. Equally comfortable rolling up my sleeves on systems strategy, HR tech tooling, and cross-functional execution.

CORE STRENGTHS

- People Ops & Shared Services Leadership
- HR Tech Systems (Airtable, Rippling, Internal Automation)
- Performance Management Frameworks
- Remote-First Culture & Operations
- Internal Enablement & Documentation Infrastructure
- Strategic Planning & OKR Cadence
- Cross-Functional Program Management
- Process Optimization & Scalable Workflow Design
- Data-Driven Decision-Making (GSheets, SQL, Reporting)

EXPERIENCE

SPIDEROAK

Vice President, Operations

2022 – Present

- Directed operations across HR, Engineering, Customer Success, DevOps, and IT for a fully remote, post-Series C SaaS company.
- Designed internal people systems: async-first performance review cycles, onboarding documentation flows, and hiring systems.
- Led internal HRIS evaluations, comp structure reviews, and policy updates across regions.
- Collaborated cross-functionally on compliance, risk, and legal initiatives; introduced company-wide SOP documentation cadence.
- Served as executive liaison for all internal systems tools, process redesigns, and strategic people projects.

Vice President, Customer Success

2018 – 2022

- Built and scaled the CS team from scratch, designing compensation plans, internal onboarding tracks, and cross-functional knowledge sharing.
 - Launched help center systems, internal documentation portals, and lifecycle feedback loops in partnership with engineering and marketing.
 - Advocated for customer-aligned product features, driving roadmap changes based on real user insights.
 - Implemented billing and reporting automation to reduce manual work and increase data integrity.
-

STRATEGIC PROJECTS & SYSTEMS WORK

- **Performance & Development:** Designed and ran SpiderOak's first cross-team performance review process; led documentation and rollout.
 - **Hiring Systems:** Introduced async-ready hiring loop with integrated onboarding checklists, lifecycle messaging, and internal enablement support.
 - **Tooling Oversight:** Owned evaluation and integration of internal tools across HR and support (Airtable, Notion, custom Python scripts).
 - **Change Management:** Led remote culture initiatives including handbook revamp, DEI policy audits, and quarterly feedback surveys.
 - **Cross-Team Knowledge Ops:** Built out internal training pipelines, wiki templates, and role-specific onboarding sequences.
-

FREELANCE CONSULTING (PART-TIME)

Operations & People Systems for Startup Clients

2013 – Present

- Guided multiple startups through org design, hiring workflows, onboarding improvements, and internal documentation systems.
- Created knowledge flows and performance frameworks for teams under 50 scaling up

quickly.

- Supported e-commerce and SaaS founders with HRIS setup, vendor evaluation, and tech onboarding.

TOOLS & PLATFORMS

Workday (familiar) • Airtable • Rippling • Notion • GDocs • Slack • Greenhouse • JIRA • SQL (basic) • Intercom • AI tools (ChatGPT, Claude)

EDUCATION

B.S., History

Missouri Western State University

2000 – 2005

Trained in research, systems thinking, and communication—now applied to ops, culture, and team enablement.
