

ADAM TERVORT

Vice President of Operations | Technical Co-Founder | Systems-Scale Builder

Liberty, MO · adam@adamtervort.com · 816-929-5261 · github.com/adamprime

SUMMARY

Strategic, technical operator with over a decade of experience scaling systems, teams, and cross-functional programs at fast-paced technology companies. Proven record of shipping process and culture improvements that unlock team velocity—across engineering, DevOps, finance, legal, people, and customer functions. Currently VP of Operations at SpiderOak, overseeing complex org design, GTM alignment, and enterprise tooling. Also co-founder of a pre-revenue AI startup focused on workflow extensibility and embedded reasoning. A trusted partner to CEOs and executive teams, I thrive in ambiguity, align vision to execution, and lead from first principles.

EXPERIENCE

SPIDEROAK

Cybersecurity + Infrastructure Software | Remote | 2014 – Present

Vice President, Operations

Aug 2022 – Present

- Report directly to CEO; oversee Engineering, DevOps, HR, Compliance, IT, Customer Success, and Internal Ops
- Led post-RIF reorganization, rebuilding engineering and executive functions during critical funding cycles
- Revamped performance management, budgeting, and hiring systems across business units
- Directed transition to unified O365 stack; implemented Okta org-wide and managed cross-functional enterprise tooling
- Guided go-to-market and partner operations for key cybersecurity offerings, including space market services
- Active contributor to board strategy, audit processes, M&A planning, and leadership hiring

Vice President, Customer Success

Oct 2018 – Jul 2022

- Built and scaled CS org from scratch—established onboarding, support, and account retention playbooks
- Integrated CS feedback directly into product roadmap (CrossClave); improved NPS and

renewal rates

- Directed support automation, revamped documentation, and owned full billing pipeline (Stripe, PayPal, Salesforce)

Customer Success Director

Jan 2017 – Sep 2018

- Defined KPIs and reporting systems that became company standards
- Oversaw Tier 1–3 support, incident response coordination, and technical onboarding

Support Engineer

Jan 2014 – Jan 2017

- Technical support for SpiderOakONE across macOS/Linux CLI and desktop
- Built internal knowledge base and customer education guides
- Maintained customer billing tools and identity workflows

ALIGNMENT ENGINES

Pre-Seed AI Workflow Startup | Remote | 2025 – Present

Technical Co-Founder & Strategic Operator

- Co-founded early-stage company building a multi-agent AI platform for high-trust executive workflows
- Built initial product specs, customer onboarding experience, and internal operations framework
- Developed role-based instruction stack (“Lenses”) for personalized, context-aware AI coaching interactions
- Led development of admin tooling, documentation, and GitHub-based release process
- Evaluated and tested developer-focused interfaces including Warp and Ghostty
- Oversaw TDD-style design reviews, LLM prompt chaining systems, and internal governance cadence

SELECTED PROJECTS

- **Enterprise Tooling Modernization** – Led system unification across Microsoft 365, Okta, and internal SSO stack; reduced provisioning time and eliminated 3+ legacy systems
- **Revenue & Cost Optimization** – Built financial reporting processes and partner billing systems that enabled a 30%+ increase in enterprise account size (e.g. Red Hat)
- **Cross-Team Operating Rhythms** – Ran engineering-product-customer feedback loops; developed company-wide planning and QBR cycles that remain in use today
- **Board-Level Strategic Initiatives** – Managed due diligence and readiness for divestiture of SpiderOak business unit; led vendor and board communication workflows
- **AI-Embedded Workflows** – At Alignment Engines, built prompt architectures for

multi-agent AI use in product marketing, OKR planning, and GTM strategy

EDUCATION

B.S., History

Missouri Western State University · 2000 – 2005

- Foundation in systems thinking, research, and complex organizational analysis
 - Graduated with departmental honors
-

TECHNICAL & TOOLS

- **AI & Dev Tools:** OpenAI APIs, Claude, PromptLayer, Cursor, Warp, Ghostty, VS Code
 - **Infra & Ops:** Okta, 0365, Supabase, Google Workspace, Slack, Notion, GitHub
 - **Support/Customer Stack:** Zendesk, Intercom, Salesforce, Stripe, PayPal
 - **Project Mgmt & Analytics:** Jira, Asana, Looker, Google Sheets, Amplitude, SQL basics
-

NOTABLES

- Built and led multi-disciplinary teams across technical and go-to-market functions
- Comfortable managing across HR, legal, compliance, IT, and security domains
- Experienced in highly regulated, high-risk environments (e.g. government, space, cybersecurity)
- Regular speaker and internal trainer on operations, alignment, and scaling systems
- Strong personal motivation to support tools that empower technical builders
