SUMMARY

Experienced, people-first program leader with a background in design team management, cross-functional operations, and scaling systems that support great user experience. At SpiderOak, I've led operations across product, customer success, engineering, and design, bringing structure and clarity to fast-moving, distributed teams. I specialize in enabling collaboration, building process with empathy, and turning complex workstreams into focused execution.

I'm passionate about design tooling, program efficiency, and emerging technologies—particularly AI—and love helping product/design/engineering teams work better together.

CORE STRENGTHS

- Design Program & Lifecycle Management
- Cross-Functional Stakeholder Alignment
- Scalable Process Design & Team Enablement
- Design Team & UI/UX Collaboration
- AI-Enhanced Tools & Agent Workflows
- Documentation, Onboarding & Knowledge Management
- Internal Communication & Change Navigation
- Remote-First Leadership Practices

EXPERIENCE

SPIDEROAK

Vice President, Operations

Aug 2022 – Present

- Oversaw engineering, DevOps, design, IT, HR, and CX; design team reported to my org until restructuring.
- Partnered with product and design leads to prioritize roadmap execution, design reviews, and team resourcing.
- Led async operations infrastructure: design lifecycle documentation, launch workflows, and feedback systems.
- Built internal knowledge systems (Notion, Airtable, GitHub) to support onboarding, product design, and execution.
- Oversaw vendor evaluation and tooling rollout (e.g., HelpScout, Linear, Airtable) for product and design teams.
- Collaborated on executive-level roadmap prioritization and strategic initiatives across product + CX + design.

Vice President, Customer Success

Oct 2018 – Jul 2022

- Owned product feedback loop between CX and design/product; represented user voice in roadmap planning.
- Co-led brand and marketing redesign projects with contract designers; collaborated across UI, brand, and growth.
- Integrated support data into product reviews; worked with design teams to refine product UI and help center flows.
- Launched AI tooling experiments (Whisper API, ChatGPT, Cursor) for operational and customer documentation.

DESIGN COLLABORATION EXPERIENCE

- Managed hybrid design teams (visual, brand, UI/UX, web) for product and marketing projects
- Developed launch comms plans, user docs, and onboarding materials in partnership with design & product
- Participated in full design lifecycle reviews—from kickoff through QA feedback and success measurement
- Advocated for design team resourcing and workflow efficiency in executive planning

TOOLS & TECHNOLOGIES

Design & Documentation

Figma • Notion • Airtable • Confluence • JIRA • Google Workspace

AI + Automation

OpenAI (ChatGPT, Whisper) • Claude • Cursor • LLM-enhanced workflows

Dev & Ops

GitHub • REST APIs • Linear • Markdown-based documentation systems

EDUCATION

B.S., History

Missouri Western State University

2000 – 2005

Emphasis on systems thinking, research, and communication—core skills in design program work today.
