SUMMARY

VP Operations with 10+ years driving operational excellence across complex SaaS platforms. Led cross-functional operations spanning 5 departments while serving as product owner for distributed systems platform. Deep expertise in program management, planning cycles, and process automation that reduced operational overhead by 30% and improved delivery predictability.

Bridge between technical execution and strategic operations with proven ability to translate ambiguous requirements into actionable plans. Track record of implementing governance processes, managing dependencies at scale, and enabling teams to deliver faster with higher quality. Experienced cryptocurrency user and distributed ledger technology practitioner passionate about blockchain's potential to transform financial systems.

CORE COMPETENCIES

- Product Operations & Program Management
- Planning Cycles & Governance Processes
- Cross-Functional Alignment & Execution
- Distributed Systems & Platform Operations

- Process Improvement & Automation
 - Budget Planning & Resource Allocation
 - KPI Development & Performance Metrics
 - Technical Stakeholder Communication
 - Management Consulting (Internal/External)
-

PROFESSIONAL EXPERIENCE

SPIDEROAK / VICE PRESIDENT, OPERATIONS / AUG 2022 - PRESENT

- Direct platform-wide operations across Engineering (40-member team), DevOps, IT, HR, and Customer Success departments, ensuring predictable delivery and operational excellence.
- Manage quarterly and biannual planning cycles across 5 departments, maintaining roadmap hygiene and priority alignment with executive strategy.
- Partner with finance team and CEO on budget planning activities including headcount allocation and ROI analysis for \$13M Series C funding.
- Implement continuous improvement initiatives that reduced operational overhead by 30% through process automation and tooling optimization.
- Facilitate dependency mapping and risk escalation across distributed engineering teams working on complex SaaS platform.

SPIDEROAK / VICE PRESIDENT, CUSTOMER SUCCESS / OCT 2018 - JUL 2022

- Served as product owner for CrossClave distributed platform, managing feature prioritization and technical trade-offs with engineering teams.

- Built operational rhythm that improved customer retention by 25% and grew ARR by 15% through data-driven decision making.
- Led cross-functional program management for SaaS billing system integration, reducing errors and processing time by 30%.
- Established KPIs and operational metrics dashboard to maintain transparency with board and executive stakeholders.

SPIDEROAK / CUSTOMER SUCCESS DIRECTOR / JAN 2017 – SEP 2018

- Implemented queue management system that reduced operational backlog by 80% and improved resolution predictability by 60%.
- Deployed AI-driven support tools and ML-powered help center, demonstrating early adoption of AI for operational efficiency.
- Coordinated cross-functional alignment between support, marketing, and sales teams for unified execution.
- Managed planning and execution of department-wide training programs and process improvements.

SPIDEROAK / SUPPORT ENGINEER / JAN 2014 – JAN 2017

- Delivered technical support while collaborating with engineering on platform improvements and operational tooling.
- Contributed to technical documentation and process standardization across distributed teams.

CONSULTING & ADVISORY EXPERIENCE

MANAGEMENT CONSULTANT / INDEPENDENT PRACTICE / JUL 2013 – PRESENT

- Provided strategic operations consulting to 10+ organizations including American Jazz Museum leadership team.

- Advised executives on operational best practices, process optimization, and organizational growth strategies.
- Delivered program management frameworks and workflow automation reducing manual overhead for clients.

AMERICAN JAZZ MUSEUM / MANAGEMENT ADVISOR / 2019 - 2021

- Partnered with Executive Director to implement management best practices and operational initiatives.
- Guided strategic planning process resulting in improved organizational stability and growth.

PLATFORM & TECHNICAL EXPERIENCE

DISTRIBUTED LEDGER TECHNOLOGY

- Deep hands-on experience with distributed ledger platform at SpiderOak, understanding consensus mechanisms (proof of stake, proof of work, proof of ownership) and distributed systems architecture.
- Collaborated with engineering teams on technical roadmaps, code reviews, and platform architecture decisions.

CRYPTOCURRENCY & BLOCKCHAIN

- Long-term Coinbase user with practical experience in cryptocurrency trading and investment strategies.
 - Active member of Kansas City cryptocurrency club, staying current with blockchain developments and Web3 technologies.
 - Personal passion for blockchain's potential to transform financial systems aligns with Coinbase mission.
-

COMMUNITY LEADERSHIP

***RUSH CREEK VOLUNTEER LEADERSHIP TEAM | OPERATIONS LEADER |
AUG 2023 – PRESENT***

- Lead operations and strategic planning for 375-member community organization.
 - Manage cross-functional volunteer teams and coordinate resource allocation.
-

EDUCATION

B.S., History | Missouri Western State University | 2000 – 2005
Developed analytical thinking and research skills foundational to data-driven operations management.

TOOLS & TECHNOLOGIES

Operations & Program Management: Linear, Jira, Confluence, Asana, Notion, Figma, Atlassian suite

AI & Automation: ChatGPT, Claude, AI-assisted coding workflows (Cursor, Windsurf), Python/JS automation, API integrations

Data & Analytics: Looker, Power BI, Mixpanel, GA4, SQL (Postgres), Python (pandas)

Platform & DevOps: GitHub Actions, GitLab CI, Docker, Kubernetes, AWS, Azure, Datadog

Identity & Security: Okta (org-wide SSO/MFA rollout), vulnerability management workflows

Finance & Planning: Salesforce, HubSpot, Stripe, subscription billing integrations

Collaboration: Slack, Teams, Zoom, Loom, Google Workspace, 0365
